Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A;Cross-references: GB:D26602; NID:g496384; PIDN:BAA05649.1; PID:g496385
C;Function:
A;Description: catalyzes the formation of peptidyl-serine-phosphate or peptidyl-threoni
C;Superfamily: AMP-activated protein kinase; protein kinase homology
C;Keywords: ATP; magnesium; phosphotransferase; serine/threonine-specific protein kinase
F;17-271/Domain: protein kinase homology «KIN»
F;25-33/Region: protein kinase ATP-bindding motif
F;48,65/142,144/Active site: Lys, Glu, Asp, Lys #status predicted
F;147,151/Binding site: magnesium (Asn, Asp) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        probable serine/threonine protein kinase (EC 2.7.1.-) SNFL3 - sorghum
N.Alternate names: SNF1 protein kinase homolog SNFL3
C,Species: Sorghum bicolor (sorghum)
C,Date: 20-Sep-1999 #sequence_revision 20-Sep-1999 #text_change 21-Jan-2000
C,Accession: T14822
R,Annen, F.; Stockhaus, J.
Bot. Acta 111, 137-142, 1998
A,Fitle: SNFL3 a protein kinase homolog of Sorghum bicolor with a high similarity to the A,Fitler: preliminary; translated from GB/EMBL/DDBJ
A,Gatus: preliminary; translated from GB/EMBL/DDBJ
A,Robecule type: mRNA

C; Function:
A; Introns: 64/1; 125/3; 186/3; 230/3; 292/3; 322/3; 350/3; 396/3; 475/3
C; Function:
A; May-activated protein kinase; serine-phosphate or peptidyl-threonine
C; Superfamily: AMP-activated protein kinase; serine/threonine-specific protein kinase
F; I7-271/Domain: protein kinase ATP-binding motif
F; I7-271/Domain: protein kinase ATP-binding motif
F; Molecule type: Molecule Site: Lys, Glu, Asp, Lys #status predicted
F; 147,151/Binding site: magnesium (Asn, Asp) #status predicted

-!- SIMILARITY: Belongs to the Ser/Thr family of protein kinases. SNF1
                                                                                                                                                                                                                                                                                                                                                                                                                "Genetic evaluation of the function of SNF1 in Candida tropicalis.";
"Genetic evaluation of the function of SNF1 in Candida tropicalis.";
Submitted (MAR-1999) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Essential for release from glucose repression. It
interacts and has functional relationship to the regulatory
protein SNF4. Could phosphorylates CAT8 (By similarity).
-!- SUBCELLULAR LOCATION: Associated with the nuclear membrane (By
                                                                                                                                                                                                                                                                                                                                    Eukaryota; Fungi; Ascomycota; Saccharomycotina; Saccharomycetes; Saccharomycetales; Candida.
